## LEAP'S PROLIFIC WHEAT "Yields Fifty Bushels to One"

The following letter, just received from one of our customers, is only one of many that we have received, testifying to the extraordinarily prolific character of this wheat:

"Noticing several letters from your customers, in your October number of "Crop Special," as to results they had with Leap's Prolific Wheat bought of you, thought you would like to know my experience. Last fall I bought of you eight bushels of the abovementioned wheat and disked up the land from which I had cut tobacco, sowed the wheat with a drill without any fertilizer, and made 398 bushels of clean wheat, within a fraction of fifty to one. This was on my farm in Orange County, Va.

J. P. TAYLOR." We recommend to our customers very strongly to sow this variety in preference to other varieties of wheat. Farmers visiting the State Fair can procure further information in regard to this wheat at either our exhibit or our stores.
